PLAY ONE BOX

Before you start

Play One Box

1 Have your login details ready

Your seller gives you a **Server URL**, a **Username** and a **Password**. Keep them handy: every app asks for these three. If you don't have them yet, ask your seller.

2 Check your internet

You need at least **8 Mbps**. For the smoothest picture, use a network cable or 5 GHz Wi-Fi.

3 Up to 3 screens at once

Your subscription works on **3 devices at the same time**. Set up each device with the same details.

4 Use the original apps

Some app stores list fake copies. Check the developer name we give for each app before you install.

Your login details

Your seller gives you these details. Type them exactly as shown.

SETUP GUIDE

Roku

Roku Express, Roku Streaming Stick, Roku Ultra and Roku TVs (TCL, Hisense, onn.)

Play One Box

App **Screen mirroring from your phone** · **About 5 minutes**

1. Roku doesn't allow IPTV apps in its store, so you send the picture from your phone to the TV. First set up Play One Box on your phone with the **Android phone** or **iPhone** guide.
2. Connect your phone and your Roku to the **same Wi-Fi network**.
3. **Android:** on the Roku, go to **Settings** → **System** → **Screen mirroring** and set the mode to **Prompt** or **Always allow**.
4. **Android:** on your phone, swipe down from the top and tap **Smart View**, **Screen Cast** or **Cast** (the name depends on your phone). Choose your Roku, then select **Allow** on the TV.
5. **iPhone:** on the Roku, go to **Settings** → **Apple AirPlay and HomeKit** and turn **AirPlay** on. (Available on most 4K Roku models.)
6. **iPhone:** open Control Center, tap **Screen Mirroring**, choose your Roku and type the code shown on the TV.
7. Open the player app on your phone and play a channel. Turn the phone sideways to fill the TV screen.

You need

- ✓ Play One Box already working on your phone (Android or iPhone guide)
- ✓ Your phone and your Roku on the same Wi-Fi

Tip Keep your phone charging and close to the router while you watch. For the best picture and a real TV remote, plug a Fire TV Stick into the same TV and follow our Fire TV guide.

Troubleshooting

Play One Box

1 “Invalid login” or “Authorization failed”

Check each detail for typos. Username and password are case sensitive. Type the full Server URL, including **http://** and the port number (for example **:8080**) if yours has one.

2 The picture freezes or buffers

Restart your router and your device. Move closer to the router or use a cable. Close other apps that are streaming or downloading.

3 Channels or the TV guide are missing

Refresh the playlist in the app settings, or remove the playlist and add it again with the same details.

4 “Too many connections”

Your plan allows 3 devices at once. Stop watching on another device and try again.
